DESCRIPTION OF THE INCIDENT

At approximately 8:30 AM, Haiqal was riding his motorcycle on the West Coast Expressway (WCE) Highway while travelling to work in Ijok Warehouse during heavy rain. He intended to stop at a sheltered area to put on his raincoat but overshot the intended stopping point. He then applied the brakes, causing the motorcycle to skid and fall.

As a result of the accident, Haiqal suffered a sprained shoulder, and the motorcycle sustained scratches. After the incident, he went to a clinic for medical treatment and was issued a medical certificate (MC).

PRELIMINARY CAUSE

- Heavy rain and wet road conditions reduced the motorcycle's tyre grip.
- The rider overshot the intended stopping point and applied the brakes, causing the motorcycle to skid and fall.
- The rider may not have maintained a sufficient stopping distance under wet road conditions.

PREVENTIVE ACTION

- Reduce speed when riding in heavy rain condition.
- Apply the brakes gradually to avoid sudden braking on wet roads.
- Stop at a safe location before putting on or adjusting a raincoat.
- Conduct regular safety briefings on safe motorcycle riding, especially during bad weather.
- Remind employees to prioritise road safety and avoid sudden manoeuvres when travelling to work.
